

# Curve Edge Banding Machine

**WOODTECH**  
Panel Line

## ■ KN-700-3

MODEL KN-700-3	
Total Power:	6.5Kw
Air Pressure:	0.6-0.8Mpa
Glue pot temperature	110°C-210°C
Hot Melt adhesive type:	EVA/PUR
Head rotation angle:	±15°
Glue pot capacity:	2600ml Glue pan
Width of edge banding strip	14-70mm
Thickness of edge banding strip	0.5-3mm
Thickness of trimming board	<14mm, 14-70mm single-side trimming, 14-70mm upper and lower trimming (related to trimming knife)
Inner arc radius	≥20mm (4mm sealing radius for special operation)
Edge sealing speed	0-30cm/s
Trimming speed	0-24cm/s
Packaging Size	204x150x160 cm
Weight	700kg
Voltage	415/50Hz/3p

### common selling points :

Laser precise docking error+0.3mm/ foot broken belt; Standard with 14, 30cm two suction cups Hot air auxiliary, cleaning device

### 700-3 Upgrade Selling point

- 1 KN700C-a upgrade auxiliary feeding device, can realize the outer arc, outer circle, L-shaped plate automatic edge sealing (can not completely replace manual)
- 2 KN700-3 Upgrade the glue pot, you can achieve one-click row of glue, you can also use a variety of color properties of hot melt glue. such as pure EVA. KN700-3 increase secondary auxiliary pressing, pressing effect is better
- 3 KN700-3 trimming part upgrade different thickness of the plate without regulating the pressure beam, the upper trimming edge is self-weight induction, can achieve different thickness the plate adaptive trimming
