

WOODTECH

The 3D - CAD SYSTEM

PLANNING - PRESENTATION - PRODUCTION

OVERVIEW OF MODULES

WOODTECH WOODWORKING MACHINES

Giving New Dimensions to Wood

WOODTECH

Real Time Presentation

Create presentation files that play automatically and can be viewed on any computer - no matter where.

Animation

Video files in full HD quality can be saved within minutes. Of course, they can also be equipped with surround sound right away.

Photo-realistic Images

PYTHA saves high-resolution, full color images that are ready for print, or just for being attached to an email, in less than 10 seconds.

Visualization

2 minutes*

AUTOMATIC BEAM SAW

Estimation software

The PYTHA parts list offers an extremely flexible interface to almost any management and estimation software.

Printing and Plotting

All information in your PYTHA CAD project can be printed out on printers and plotters in all sizes, or be exported in the file formats PDF, EMF or DWG.

Label plot

Automatically generated labels and component drawings, with an integrated bar code if needed.

CNC machines

Connectivity to CNC machines of all major manufacturers.

Nesting

Cutting optimization including bore hole patterns and CNC programs at the push of a button.

PYTHA can also be used to optimize the positions of free-form parts on supply of any shape.

Parts list

Cutting list

Power User: Private client / Living room cabinet Job number: 123-201 00/202011

Code	Name	Length	Width	Height	Material	Volume	Unit price	Total price
1	Door RH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
2	Door LH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
3	Door FH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
4	Door FH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
5	Door FH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
6	Door FH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
7	Door FH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
8	Door FH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
9	Door FH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766
10	Door FH	595	873	18	Chapman Indian Apple Tree	19.230 m³	4.200	80.766

2 seconds*

technical Drawings

5 minutes*

CNC-Programs

2 minute*

After just a short learning phase, you will plan your projects faster than ever - and in three dimensions! The easy user interface and the comprehensive tools help you to bring any of your designs to life.

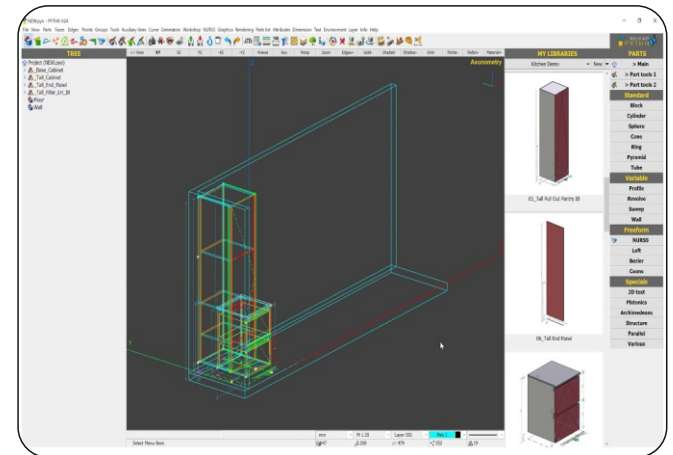

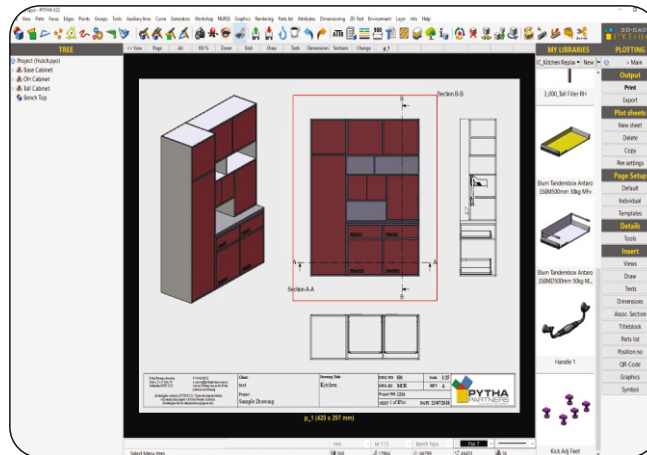

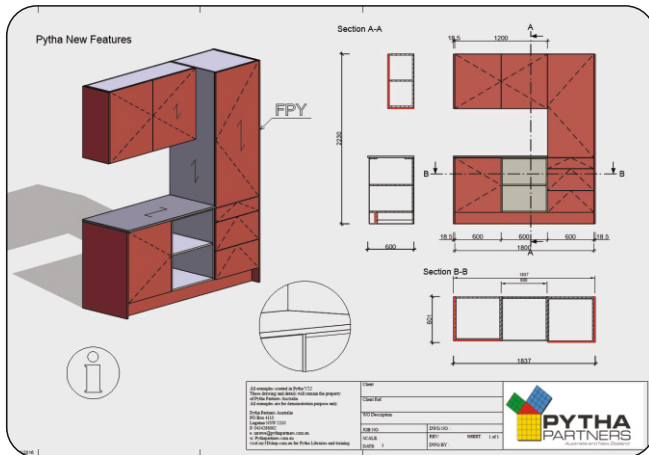

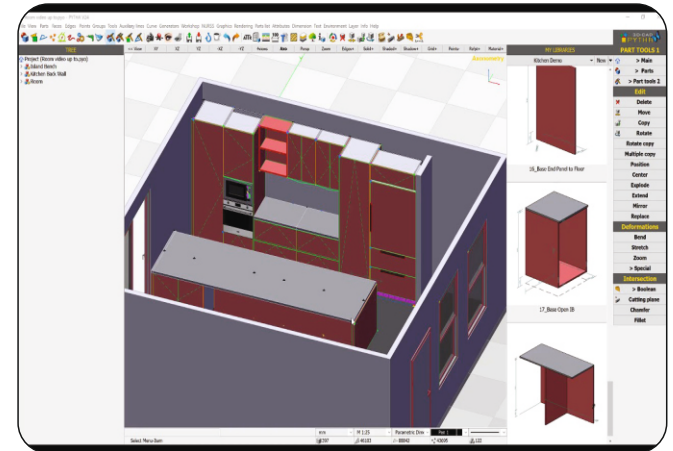

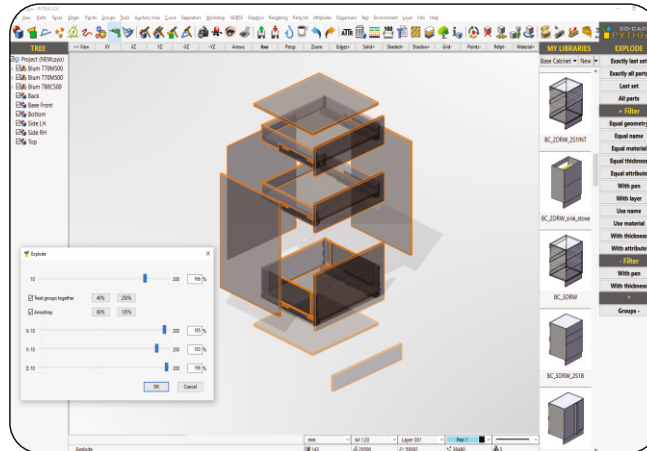

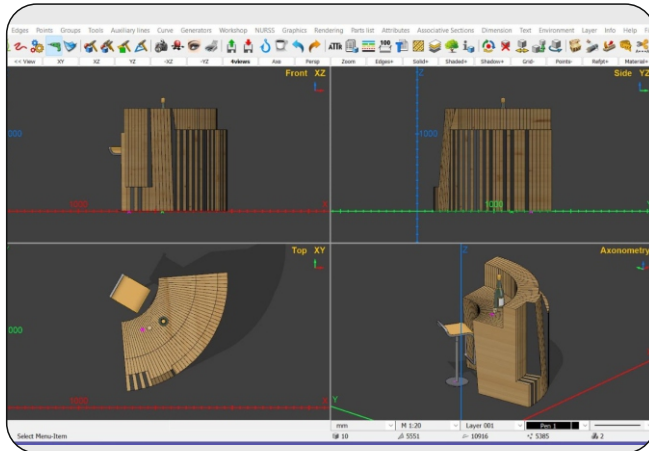

No matter whether you have to transfer data to a CNC machine only occasionally or this is an essential part of your everyday work, PYTHA will create CNC programs for you and make your work easier than ever.

PRESENTATION

PLANNING

PRODUCTION

OVERVIEW OF MODULES

Modler

All you need for the professional entry into the world of 3D CAD, to become productive immediately, to make your visions real.

- Intuitive modeling in 2D and 3D
- Structured organization of your projects using names, layers, groups etc.
- Clearly laid out technical drawings with labels, dimensioning, hatching, symbols, associative sections and QR codes
- Impressive visualization with integrated high-performance raytracer
- Create and use libraries

And use the most important file formats:

DWG, DXF, 2D-DXF, 305, SKP and STL for 3D printer

Versatile special tools and Innovative modelling functions for sophisticated 3D designs.

- Curve, outline recognition, 3D text,
- Special tools for deformations,
- Comfortable auxiliary lines,
- Automatic 2D revolve
- Dynamic actions of parts (e.g. open doors or drawers)

SMART PARAMETRICS:

- Smart extend,
- Change number
- Edit complex radii

Parts List

Flexible evaluation of your projects in lists and tables:

- User defined attributes
- Cut size, Finished size, extra length
- Edge banding, Core material, Face coating
- Position numbers
- CNC program name

Easy calculation using price per piece, per length or per area.

Export to printer or csv file.

Full flexibility of export formats to spreadsheet software, ERP, CRM, Excel, Word, XML, HTML, user defined layout, File import

Workshop

Prepare your 3D model for machining Connectors as e.g.

- Cam&Dowel, hinges or dowels can be assigned automatically, according to your rules
- Print labels with barcode or QR code
- Customized to individual principles of design
- Miter, grooves and shapes that require 5 axes machining can be exported.

OVERVIEW OF MODULES

Parametrics

- Parametrize your parts and create your own variable library.
- Variable dimensions
- Placeholder for variant designs
- Replace function

Generators

- Use the cabinet generator to create any type of cabinet with subdivisions, various fronts, bases, back and with roof slope.
- Additional generators for: doors, drawers, shelves and bottle shelves.

Library

- Over 25000 library elements to be used in:
- Architecture, wood working,
- Exhibition design, shop fitting,
- Lighting design, decorative accessories and plants

Free form faces

Special tools to create objects with curved surfaces.

OVERVIEW OF MODULES

CAM interface

- The Ideal completion of the PYTH A workshop:
 - WoodWop.mpr, WoodWop.dxf,
 - Alphacam,
 - BiesseWorks .cix, bSolid / b.works .dxf,
 - NC Hops, En Route, Cobus Ncad,
 - Format-4, Imawop, SCM Maestro,
 - G-Code
- others on request

Nesting

- Efficient and fast optimization of parts on a supply part, even for any shape of outline: Rectangular, saw and free form optimization.
- Allows for different materials and panel thickness.

RadioLab

Real time rendering with Radiosity technique, for stunning presentations:

- Interactively move through the scene
- Simulation of lightning situation
- Indirect light, daylight, LED, ...
- Turn on/off lights in real time
- Easily create, assign and edit textures, materials and surfaces
- Quick modifications within a scene
- Professional lighting planning
- Manual hatching+ numerous filters
- App for iOS and Android

PYTHA Viewer

Free download at www.pytha.com

KDT Optimizer

OVERVIEW OF MODULES

Pyogram (With Service Contract) Your Pytha Support Partner

- Login to get free libraries, training & Support
- Panorama 360 views with your company logo

Scan Here

High -End Rendering

- Upgrade your real time presentation by HDR functions, for a photorealistic image of your scene.
- Image based lighting (IBL) for image compositions and quick illumination
- VR support, Oculus Rift

CAD Bid

Bid on your Job online now

- Data centralized at one location on cloud.
- Admin can give specific rights to each employee, dealer or franchisee.
- Dashboard for each individual user for
- data analysis, order won ratios, top 10 customers etc.
- Change materials or hardware right in front of customer.
- Get your process and manufacturing cost with a click
- Desktop, Mobile & iPad friendly

Animation

- Save an animation fully automatic as video file.
- Combined real time actions
- Animated daylight simulation
